

**Edvard Grieg: Complete Symphonic Works, Vol. V****aud 92.671****EAN: 4022143926715**[Classical CD Choice](#) (Barry Forshaw - 2015.11.16)

What a delight this survey of Grieg's orchestral music has proved to be – a tantalising delight, it has to be said, as there have been considerable gaps between the various additions to the series over the years. While individual recordings of some of the music might be more striking elsewhere, as an entity, this largely complete recording of the orchestral music has proved to be no definitive and – what's more – recorded in the best possible surround sound.
