Customer Review: Excellent Performance and Sound

Excellent interpretation and performance by organist Hans-Eberhard Roß. The super-audio sound is riveting and filled with clarity. The Goll Organ (1998) of St. Martin, Memmingen, Germany, although not of the French romantic symphonic Cavailla-Coll organ pedigree, is well suited for this music: the tone coloring and power, and the venue are just right. I have other recordings of these organ symphonies, but this set is my favorite. Highly recommended.
